

Eighth Biennial Report: 1929-1930 (Classic Reprint)

By Montana State Board of Entomology

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Eighth Biennial Report: 1929-1930 To His Excellency, John E. Erickson, Governor of Montana, Helena, Montana. My dear Sir: The services of the ex-officio Montana State Board of Entomology have continued without interruption since 1913. There has been no change in the personnel of the Board. There has been a determined effort to bring spotted fever under control and real progress has been made, for what has been done will not have to be done over again. At the same time, spotted fever is spreading in Montana and in other western states and at the present time is far more of a problem than it was when the Board of Entomology took up its duties. It is now recognized both in Montana and other western states that the problems of Rocky Mountain spotted fever, tularaemia and tick paralysis, all of which are produced by the wood tick of this region, are not problems for Montana alone but apply as well in some twelve other states. Accordingly, in recent months an effort has been made to turn...

Reviews

A brand new eBook with a new standpoint. I have got read through and i also am confident that i will gonna read again once again down the road. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Miss Shannon Hilll V**

This sort of pdf is everything and made me searching forward plus more. Better then never, though i am quite late in start reading this one. You may like just how the author compose this book.
